EXPERIENCE

CH-Lead - Business Development Officer

July 2023 - September 2023

- Modernized visual identity by implementing a cohesive design system and grid-based layouts to create a professional, aesthetically pleasing interface.
- Optimized content architecture to reduce information overload and improve scannability, ensuring an intuitive and friction-free user journey.

Concentrix - IT Operations Intern

April 2026 - July 2026

- Delivered Tier 1 IT support for end users by troubleshooting hardware and software issues, maintaining high user satisfaction and reducing operational disruptions.
- Executed OS imaging, remediation, and compliance updates on desktop and mini PCs, ensuring systems met enterprise security and configuration standards.

PROJECTS

Secure Web Based Workflow Management System

Nov 2025 - March 2026

- Developed a Secure Web Based Workflow Management System for the ICT Office of the City Government of Biñan using the MERN stack (MongoDB, Express.js, React, Node.js).
- Streamlined operations by reducing 76% of non-value-adding processes within the departmental workflow.
- Secured microservices using mTLS, AES-256-GCM, and ECDSA to ensure mutual authentication, confidentiality, and data integrity.

ParkGuard: Parking App

April 2025 - July 2025

- Built a real-time parking app for Mapúa Malayan Colleges Laguna using Kotlin and Jetpack Compose.
- Engineered backend services with Ktor and PostgreSQL to handle live parking data and database persistence.

Attendance Monitoring System

Dec 2023 - March 2024

- Automated attendance tracking for CCIS Department Week by building a full-stack system with PHP and Oracle.
- Leveraged Tableau for data visualization, enhancing the clarity and accessibility of complex datasets.
